TOWN COLLECTION

Royalpark

Introducing the Grand View and Mountain View Collections

Surrounded by nature in the premier location of Milton, Panorama's Grand View and Mountain View Townhome Collections boast stunning views of the Niagara Escarpment.

The Grand View Collection consists of 3-storey towns with an added private rooftop deck, providing beautiful panoramic views of the escarpment. The Mountain View Collection offers 2-storey rear lane towns facing the escarpment to appreciate the picturesque and iconic landmark.

Enjoy Milton's Panoramic backyard and experience this magnificent landscape from your door.

Contemporary living
in the heart of nature

A community designed for families.

As a builder, we at Royalpark understand the difficult challenges buyers face in today's market. Too often, families need to make the trade-off between square footage and the quality of their community.

We knew with Panorama, we wanted to make a product that really spoke to our owners; and as a result, we designed the terra series with two goals in mind; We wanted to create a family-friendly community with beautiful curb appeal, and we wanted to maximize the square footage and lifestyle that our families could get out of each of their homes.

As a result of our insistence on achieving our goal, we designed the townhomes in the Terra Series with a Rear Lane planning concept. Rear lane refers to the townhome's garage and is accessible from the back of the house (through a rear lane) rather than the front.

What's the result of choosing the Rear Lane design? With no driveways or garages visible from the front of the home, the visual flow of the architecture remains unbroken! As a result, streetscapes are uncluttered, and the community is more pleasant to live, walk, and live in. Additionally, with rear lane designs, families enjoy excellent floor plan layouts, best-in-the-market square footage and the most "home for-their-dollar".

ROYALPARK PANORAMA MILTON

NEXT-GEN HOME BUILDING SOLUTION

AN INTEGRATED MULTI- LAYERED WALL SYSTEM WITH CONTINUOUS INSULATION

A new generational building solution, field-tested around the world for over 35 years. The revolutionary Sto Wall Systems reduces your energy costs by 15%! This pre-fabricated building envelope delivers superior fire, acoustic and thermal performance; better moisture protection with improved durability, increased energy efficiency. It's fully code compliant and can take on any exterior brick, stucco, stone, or siding - for incredible curb appeal.

KEY BENEFITS TO YOU AS A HOMEOWNER:

15% LESS ENERGY COSTS

Reduce your bills with superior energy performance

SUPERIOR VALUE COMPARISON

R-Rating over 30 means more energy savings

3x LESS CO₂ EMISSIONS

Less energy usage reduces your carbon footprint

EYE CATCHING AESTHETICS

A wide range of 342 different brick selections

THERMAL PERFORMANCE

Products meet or exceed energy & code requirements

IMPROVED AIR QUALITY

Verified low-emission materials means a healthier home

AIR WEATHER PERFORMANCE

Barrier helps seal the building from air & heat leakage

sto

Building with conscience.

Shaping Today's World for a Better Tomorrow

Royalpark Homes has over 30 years of experience in building unparalleled homes while being an active member of The Building Industry and Land Development Association (BILD) since 1986. Founded by the late Davide De Simone in the mid 1980's, Royalpark Homes continues its legacy as a family-owned business that has grown from a builder into an integrated development and construction company that has pioneered the path towards high-energy performance homes throughout the G.T.A. .

Awarded as one of Ontario's most energy-efficient home builders and the recipients of the CRESNET President's Award in 2021, Royalpark Homes is recognized for use of the HERS index; an industry standard that presents a common language by which U.S. and Canadian Home Performance can be measured. Achieving a score of 42, this is considerably below the threshold for Zero Ready Homes among all builders in Canada.

With that award-winning dedication comes Royalpark's commitment to building greener communities that work towards bettering the environment from their Powerhaus technology at Simcoe Shores, Geothermal integration at 8Haus in Toronto, NEXTGEN Smart Homes at Westfield in Brampton and now incorporating Better than Code and STO Wall Systems into the Panorama community.

Royalpark's experience in building greener communities has gained respect from the industry and several awards and achievements acknowledging their commitment to shaping the world today, for tomorrow.

Panorama Milton is inspired by the natural elements

With Milton's escarpment and surrounding landscape as inspiration, the Terra Series was created.

The O2 Series is an open space that has been influenced by the future park and the adjacent escarpment.

H2O Series was inspired by the nearby ravines, the road to Lake Kelso, and the upcoming channel system that protects the natural environment..
